1 Introduction

1.1 Document Purpose

This document describes the changes introduced in the Equiduct Trading System (ETS) full release 202203a version.

1.2 Intended Audience

This document is aimed at systems developers of Equiduct members and third-party vendors who are currently connected to the Equiduct Trading System.

This document does not provide all the business level information pertinent to Equiduct: see “Related Documents” above for details of further system documentation. Updates to this and other key documents can be found at <http://www.equiduct.com>.

2 Functional Changes

It is now possible via configuration to enable and disable iceberg order entry.

3 FIX Changes

There are no FIX changes in this release.

4 ITCH Changes

There are no ITCH changes in this release.

5 Other Changes

There are the following changes in this release.

- Compiler upgrade
- Provide all binaries using 64-bit builds
- Upgrade Python to Python 3

6 Bug Fixes

There are the following bug fixes in this release:

- Equiduct trades during the post open/post auction incorrectly trigger stop order immediately
