7 Connectivity fee schedule

7.1 Physical connectivity

Each trading member of Equiduct is eligible for a resilient pair of 1G cross-connections to the Equiduct production environment at Interxion LON1 with no charge from Equiduct.

Other clients are charged as per the table below:

| Number of connections | Fee per connection |
|--------------------------|-------------------------|
| First two 1G connections | €500 per month |
| Additional connections | €1,000 per month |
| 10G connections | Not currently available |

In all cases, clients are responsible for ordering and paying for cross-connections from their infrastructure to Equiduct.

7.2 Logical connectivity

A single FIX order entry session ("FIX port") provides resilient access to primary and backup FIX gateways and allows access to all market segments and trading services.

A single FIX drop-copy session ("Drop-copy port") provides resilient access to primary and backup FIX gateways and allows a trading member to receive copies of all their trades across all Equiduct segments and services.

| | All Users |
|----------------------|-------------------------|
| FIX Trading Port Fee | €290 per month per port |
| Drop-copy Port Fee | €580 per month each |

Notes

- Default rate limit per port is 500 messages/sec. Equiduct reserves the right to charge an increased fee for high-message-rate ports (e.g. > 1,000/sec).
- Port fees may be waived for up to 90 days, on a case-by-case basis, where Equiduct
 is satisfied that additional port(s) are temporarily required during migration to, or
 rollout of, new technology or service usage.

7.3 Connectivity to Client Specific Market Data Feed

Each trading member of Equiduct is eligible to consume their own version of the Client Specific Market Data feed.

| | Fee |
|------------------------------------|---------------------|
| For each Trading Participant | €1,181.25 per month |
| For each additional sub-ID session | €236.25 per month |

Notes

• The 'For each Trading Participant' fee includes a connection to both gateways for a single sub-ID (or for the parent participant itself)
