18 June 2026

Dear Clearing Member,

Cboe Clear Europe published a market notice on the 26 March 2026 informing clearing members of its appointment to clear the US segment on Equiduct subject to regulatory approvals.

We would like to inform clearing members that Cboe Clear Europe is awaiting the approval from the regulator, as a result, the planned go-live on 22 June 2026 will not proceed as scheduled. A new go-live date will be communicated following receipt of the required regulatory approval.

Cboe Clear Europe remains committed to extending its market coverage to include the US segment for Equiduct, providing clearing members and their clients access to a broader set of equities and settlement in DTC and USD.

Clearing members will be informed of the new go-live date as soon as the regulatory approval process has closed.

We appreciate your understanding and will keep you informed of further developments.

Should you have any further queries, please contact our Relationship Management team.
